

# Appium Automation Tester Job Description template

## Appium Automation Tester Job Description Template/Brief

We are seeking a skilled Appium Automation Tester to enhance our software quality assurance process. The role involves developing and executing automated tests to ensure product quality. The ideal candidate should have a strong background in test automation and excellent problem-solving skills.

## Appium Automation Tester Job Profile

As an Appium Automation Tester, you will design and implement automated test scripts using Appium. Your primary focus is to ensure robust testing of mobile applications across various platforms. This role demands a keen eye for detail and the ability to troubleshoot and resolve issues quickly.

## Reports To

The Appium Automation Tester will report to the QA Manager.

## Appium Automation Tester Responsibilities

- Develop and maintain automated test scripts using Appium.
- Execute automated tests and analyze results.
- Collaborate with development and QA teams to identify test requirements.
- Contribute to test planning and strategy meetings.
- Write detailed and clear bug reports.
- Participate in code reviews and provide feedback on testability.
- Stay updated with the latest testing tools and strategies.
- Ensure compatibility of applications across different devices and platforms.

## Appium Automation Tester Requirements & Skills

- Proven experience with Appium and mobile automation testing.
- Familiarity with software testing methodologies and processes.
- Strong programming skills in Java, Python, or a similar language.
- Experience with version control systems like Git.
- Ability to troubleshoot and resolve issues independently.
- Understanding of continuous integration and delivery (CI/CD) pipelines.
- Excellent communication skills and attention to detail.
