Millwright Job Description Template/Brief

We are seeking a skilled Millwright to join our maintenance team and ensure the smooth operation of our machinery. The Millwright will be responsible for installing, dismantling, and repairing machinery and equipment. The ideal candidate has strong mechanical aptitude and experience with industrial machinery.

Millwright Job Profile

A Millwright plays a key role in maintaining and repairing machinery used in our production processes. They will work on-site to ensure that all equipment operates efficiently and safely. This role requires precision, mechanical know-how, and the ability to interpret technical documents.

Reports To

The Millwright reports to the Maintenance Supervisor or Maintenance Manager.

Millwright Responsibilities

- Install and assemble machinery and equipment according to layout plans and blueprints.
- Dismantle defective machines and equipment to gain access to problem areas.
- Inspect and test machinery and equipment for faults and determine necessary repairs.
- Perform routine maintenance on machinery to ensure optimal functioning.
- Adjust and calibrate machinery and equipment for optimal performance.
- Collaborate with engineers and other technicians to troubleshoot and resolve equipment issues.
- Maintain records of repairs and maintenance performed on equipment.
- Ensure all work complies with safety regulations and standards.

Millwright Requirements & Skills

- Proven experience as a Millwright or in a similar mechanical role.
- Strong mechanical skills and knowledge of industrial machinery.
- Ability to read and interpret technical diagrams and blueprints.
- Proficiency in using hand and power tools for installation and repair.
- Understanding of safety protocols and procedures.
- Physical stamina and strength to handle heavy machinery and equipment.
- Good problem-solving skills and attention to detail.
