

# Node.js Developer Job Description template

## Node.js Developer Job Description Template/Brief

We are hiring a Node.js Developer who will handle data exchange between the server and client applications. Your primary duty will be to build the server-side logic, specify and support the core database, and assure excellent performance and responsiveness to front-end requests.

Furthermore, you will be in charge of integrating the front-end pieces built by your colleagues into the programme. As a result, a fundamental grasp of front-end technologies such as Vue.js, Angular JS, React JS, or any Javascript Framework is required.

## Node.js Developer Job Profile

A Node.js developer is responsible for building server-side web application functionality in JavaScript and/or JavaScript variations such as CoffeeScript, IcedCoffeeScript, etc. Back-end components are often developed by Node.js developers, who connect the application to other (often third-party) web services and assist front-end developers by integrating their work with the Node.js application.

## Reports To

- CTO

## Node.js Developer Responsibilities

- Collaborate with other members of the team, such as front end developers
- Create and deploy Node.js code
- Make sure that updated security measures are in place to prevent unauthorised entrance
- Diagnose and correct any flaws in the code
- Create enough test suites to guarantee that all functionality stated in the design is satisfied
- Ensure that the server-side code is properly interfacing with databases
- Make sure that the code is incredibly resilient and capable of providing excellent performance to the end-user
- Align server-side code with front-end components

## Node.js Developer Requirements & Skills

- A bachelor's or master's degree in computer science, mathematics, or comparable experience
- Knowledge of JavaScript and Node.js
- Practical experience with REST, MySQL/PostgreSQL, WebSocket, MongoDB, Redis, and other technologies
- Familiarity with Docker and AWS infrastructure
- Understanding of data security concepts
- Working knowledge of JavaScript, web stacks, libraries, and frameworks
- Excellent analytical and problem-solving abilities
- Outstanding interpersonal, communication, and teamwork abilities
- Operate experience and a desire to work in a global environment
- Exceptional problem-solving and decision-making abilities
- Understanding of front-end technologies
