SAP Technical Consultant Job Description Template/Brief

We are looking for a results-oriented SAP technical consultant to oversee our company's SAP system integration.

You will work with senior management to establish our business needs, assess the effectiveness of our IT infrastructure, and build and install SAP solutions.

SAP Technical Consultant Job Profile

SAP software enables organisations to manage their customer relationship management software (CRM), supply chain management software (SCM), personnel, financial, production records, and historical data.

SAP Technical Consultants are persons with competence in the technological sector, such as programming and software development, who consult on the technical side of the SAP software (typically software implementation and integrations).

Reports To

- Tech Lead
