SAP Functional Consultant Job Description Template/Brief

As a SAP Functional Consultant, you will be responsible for providing consulting expertise in the area of SAP functional implementation, process improvement and re-engineering. You will also be required to provide support and training to clients on SAP products. In order to qualify for this position, you should have at least 5 years of experience in SAP Implementation or Support projects.

SAP Functional Consultant Job Profile

SAP functional consultants are responsible for the implementation and configuration of SAP software products. They work with businesses to understand their specific needs and then design, customize and implement solutions that maximize the use of the software for those needs.

SAP functional consultants work with clients throughout the implementation process, from the initial needs assessment through go-live and beyond. They must have a strong understanding of SAP software products, as well as how business processes are used within an organization.
