

Solution Architect Job Description template

Solution Architect Job Description Template/Brief

As a Solution Architect, you will be the primary technical point of contact for the customer facing teams. You will collaborate with sales, product, and delivery organizations to understand customer business objectives and translate them into value based technical solutions. You will work closely with development teams to ensure that the technical solution meets the customer requirements and can be delivered within the agreed upon timeframe.

Solution Architect Job Profile

A solution architect is responsible for the technical design and architecture of software solutions. They work with clients, developers, and other stakeholders to understand business requirements and create high-level design documents that can be used to guide the development process. In addition to their design work, solution architects may also be responsible for providing technical leadership and mentorship to development teams.
